User Friendly, Automatic Social Media Archiving

facebook   twitter   Instagram   tumblr

Pinterest   flickr   LinkedIn   vimeo

Nextdoor   everbridge NIXLE   YouTube

Search, organize, redact & produce responsive records with one click!

No more screen shots or chasing employees for messages.

Search, Organize & Produce polished PDFs for responsive records.

One Place to Search   **One Place to Organize**   **One place to Export**

As a Government Agency, you're typically the ones responsible for administering and enforcing regulations but, Government Agencies are also subject to public records compliance.

While finding records stored in file cabinets or on the Agency's email server are easy, requests for Social Media messages can be extremely hard to compile and delay the time the records request is completed.

Intradyn helps Agencies make this easy by

- Automatically capturing Social Media Posts, Edits & Deletions
- Storing all messages centrally (even if a user deletes the original message)
- Giving your records clerks an easy search interface (as easy as a Google Search!)

- Powerful organization tools to group messages for specific production requests
- Redaction tool to protect sensitive information prior to production and delivery.
- Easy Export feature so you can quickly package for production and track history.

![INTRADYN Email Archiving & eDiscovery]

How Does It Work?

Intradyn captures social media content in near real time via APIs and securely stores it in a centralized archive.
All posts, edits even deletions — including metadata — are saved, categorized, and indexed for fast retrieval.

View All Social Media Metadata & Content

Review social media messages the same as you would an email and add tags, apply legal holds, and redact content to support eDiscovery efforts using our one-click detail drill-down capability.

Flexible Archiving Options

Intradyn's flexible archiving options enable us to support any archive. While we are Archive Agnostic, our Intradyn archive does offer tools to make records production even easier.

Search, Retrieve & Produce

Intradyn enables you to produce Social Media communications in your choice of native or standard non-native format, making it easy to comply with industry regulations.

Support for all Major Social Media Platforms

Facebook, X | Twitter, Instagram, Tumblr, Pinterest, Flickr, Linkedin, Vimeo, Nextdoor, Nixle, Youtube.
